

Prognos

Advanced workers' compensation solution

Providing superior services and solutions to customers has always been a priority at eEmpACT. We understand that the more automated your business is, the more productive and competitive you can be. That's why eEmpACT is proud to offer a seamless integration with Prognos, a robust workers compensation solution that helps you manage your claims more effectively and efficiently.

How can Prognos help my staffing business?

Working directly with information from your eEmpACT system, Prognos automates countless important workers compensation tasks, including:

- Incident reporting
- First reports of injury
- Lost and restricted work tracking
- Transitional work management
- Claim note and task management
- Treatment guidelines
- Cost tracking
- Return-to-work and cost benchmarking

Why integrate Prognos with eEmpACT?

Prognos controls injury costs after they occur and satisfies compliance regulations. The software records, tracks, reports and measures all incidents, creating detailed history. With more than 200 reports, Prognos enables users to analyze countless sets of data to help you improve work environments and reduce your workers comp costs. For eEmpACT users, this means a very efficient way to handle workers compensation incidents by pushing data from eEmpACT over to the Prognos system where it is processed. Prognos is part of the PureSafety family, the leading provider of online safety training and risk management solutions, so you can be confident your data is secure.
