eEmpACT Software Partners With InstaStaff To Automate Communications For Staffing Industry

***New integration allows recruiters to fill positions quickly
with affordable, cutting-edge communication tool***

MINNEAPOLIS, MN. (September 5, 2006) – eEmpACT Software, a Bond International Company, announced today its new, exclusive partnership with InstaStaff, the leading provider of staffing communication fulfillment tools. The partnership enables eEmpACT customers to easily integrate with InstaStaff's robust communication services to reach hundreds of candidates in minutes, filling orders quickly with intelligent quota-based notifications.

“Utilizing InstaStaff’s technology will change many aspects of how eEmpACT customers currently do business- and provide a sizeable advantage over the competition,” said eEmpACT President & CEO Tim Giehl. “The time saved allows eEmpACT customers to increase efficiencies and concentrate on growing other areas of their business, including marketing efforts for prospecting new clients- tools already provided in eEmpACT.”

Unlike simplistic automated dialer software, InstaStaff can instantly and simultaneously send voice and text messages to phones, pagers, PDAs, email accounts and more, all for just pennies per contact. In addition to filling staffing orders, the technology can be used for a variety of other services including availability updates, timesheet reminders, shift changes, wake-up calls and more.

“The partnership between eEmpACT and InstaStaff will bring significant time and cost efficiencies to our customers in the staffing industry,” said InstaStaff Executive Vice President Patrick Stuver. “The process of effectively identifying appropriate job candidates to rapidly communicating job opportunities and filling positions makes InstaStaff the perfect communication accelerator to eEmpACT’s irreplaceable tool. We are extremely pleased to bring these products together to provide a comprehensive solution that enables eEmpACT customers to achieve a significant competitive advantage in the market.”

Combined with eEmpACT’s powerful front and back office staffing software, the integration with InstaStaff’s extensive communication capabilities provides a valuable tool allowing flexible, subscription-based service with no hardware or software to buy and no maintenance required.

About eEmpACT Software

Since 1990, eEmpACT (A division of Bond) has designed software for temporary staffing services, direct hire recruiting companies, consulting firms and corporate human resource departments to improve their productivity and deliver a higher level of service to their candidates, customers and employees. With nearly 1,000 customers and more than 45 employees, the company has offices in Minneapolis, Atlanta and Walnut Creek, CA. Developed specifically for the staffing industry, eEmpACT software combines a complete order/assignment placement and resume retrieval system with powerful accounting and customer relationship management (CRM) technology. Featuring both front- and back-office components, it provides a total and seamless recruitment, assignment, payroll and invoicing software solution that is smart, flexible and easy to use.
