eEmpACT Software Partners With PureSafety to Provide a Proven Workers' Compensation Management Solution

Leading online disability management software, safety training and risk management solution provider joins forces with largest staffing software company

MINNEAPOLIS, MN. (February 7, 2007) – eEmpACT Software (a Bond International Company) announced today that it has partnered with PureSafety to provide full integration with its Prognos™ Software modules designed to streamline and improve management of employee safety, workers' compensation and disability programs. As a leader in the industry, PureSafety's Prognos™ software has been deployed by more than 400 employers and third-party administrators who use the solution. Prognos™ integrates with eEmpACT to provide important components to help simplify and streamline everything from recording incidents and maintaining OSHA compliance to workers' compensation claim administration, integrated disability/leave management and performance benchmarking.

“The integration with Prognos™ is just another step in offering our clients the most robust staffing software solution on the market,” said eEmpACT President and CEO Tim Giehll. “By allowing eEmpACT users to utilize this technology with the click of a mouse provides significant benefits in managing workers' compensation claims, which are very time-consuming and expensive in the staffing industry.”

Prognos™ helps control the costs of injuries after they occur, while satisfying OSHA compliance regulations. The software records, tracks, reports and measures all incidents, creating a detailed history. With more than 200 reports available, Prognos™ enables users to analyze countless sets of data. For eEmpACT users, this means a very efficient way to handle workers' compensation claims by pushing data from eEmpACT over to the Prognos™ system where it can be effectively managed and tracked.

“We are excited about our new partnership with eEmpACT and the impact that Prognos™ will have for their large client base,” stated Mark VerMeulen, National Sales Manager for PureSafety's Prognos™ offering. “By integrating Prognos™ with its software offering, eEmpACT can provide their staffing company clients with a quick and easy method to initiate workers' compensation claims, manage return-to-work and control costs.”

About eEmpACT Software

Since 1990, eEmpACT has designed software for temporary staffing services, direct hire recruiting companies, consulting firms and corporate human resource departments to improve their productivity and deliver a higher level of service to their candidates, customers and employees. With nearly 1,000 customers and more than 35 employees, the company has offices in Minneapolis, Atlanta and Walnut Creek, CA. Developed specifically for the staffing industry, eEmpACT software combines a complete order/assignment placement and resume retrieval system with powerful accounting and customer relationship management (CRM) technology. Featuring both front- and back-office components, it provides a total and seamless recruitment, assignment, payroll and invoicing software solution that is smart, flexible and easy to use.
